THE HEATING AND VENTILATING MAGAZINE

INDEX TO VOLUME IV

1907

NEW YORK
HEATING AND VENTILATING MAGAZINE CO.
1123 BROADWAY

A

Air, sanitation of, Konrad Meier, Feb.
air, leakage through windows and its effect upon the amount of radiation, Burt S. Harrison, Nov.
leakage around windows and its prevention, H. W. Whitten, Dec.
leakage, effect of, upon ventilation, Jan.
volume of, required for drying, May.
washing and air washers, Sept.
American Society of Heating and Ventilating Engineers, Jan., April, May, June, July, Oct., Nov. and Dec.
Illinois chapter incorporates, April.
proceedings of thirteenth annual meeting of, Feb.
preliminary report of committee to secure data on hot water heating, May.
proceedings of semi-annual meeting of, Aug.
annual meeting of Illinois chapter, Nov.
American Foundrymen's Association, Feb., March, Nov.
American Society of Mechanical Engineers, Nov.
report of twenty-eighth annual meeting of, Dec.
American Society of Refrigerating Engineers, annual meeting of, Dec.
Anemometer, a recording, J. Roger Preston, Nov.

B

Back pressure in exhaust steam heating, Charles L. Hubbard, June.
Ballard, F. W., relative economy of steam and gas power, when exhaust steam is used for heating, Sept.
Blower, applications of the fan, Oct.
Books received:
Modern Plumbing illustrated, R. M. Starbuck, Feb.
Principles of Heating, William G. Snow, Oct.
Quick Rules for Heating and Ventilating, William J. Baldwin, Jr., June.
Water Suppy, F. E. Turneaure, Dec.
Boilers, new line of Richmond, June.
Boiler efficiency, charts showing the nature of true, Walter T. Ray and Henry Kreisinger, Nov.
Boiler regulation in Massachusetts, new, Nov.
Boilers, capacities of cast-iron sectional, Kenneth Gray, July.
use of, in Massachusetts schools, Joseph A. Moore, March.
Boston Subway, ventilation of, Feb., March.
record of the weather in, for Dec., 1906, Jan.
record of the weather in, for Jan., 1907, Feb.
record of the weather in, for Feb., 1907, March.
record of the weather in, for March, 1907, April.
record of the weather in, for April, 1907, May.
record of the weather in, for Oct., 1907, Nov.
record of the weather in for Nov., 1907, Dec.
British Institution of Heating and Ventilating Engineers, March, April, July, Oct., Nov.
Budapest, central heating and ventilating plant of the stock exchange at, Charles Knuth, Jr., July, August.
Building losses, derivation of constants for, R. C. Carpenter, March.
Buildings, methods of estimating heat losses from, Charles L. Hubbard, Sept.
Bull, Prof. Storm, death of, Dec.

C

Capacities of cast iron sectional boilers, Kenneth Gray, July.
Carpenter, R. C., derivation of constants for building losses, March.
heating systems for railway cars, March.
Cars, heating and ventilating of, E. R. Swan, August.
Carrying capacities of pipes in low pressure steam heating, William Kent, Feb.
Cary, Albert A., oily waters and their treatment, Jan.
Carrier, W. H., new departure in cooling and humidifying textile mills, June, August.
Cast-iron heating and ventilating pipes, standardization of, Louis F. Pearson, March.
Central heating and ventilating plant of the stock exchange at Budapest, Charles Knuth, Jr., July, August.
heating system for fifty-one detached buildings, April.
station heating company, typical franchise for, August.
Supply Association, Nov.
Charts showing air leakage through windows and its effect upon the amount of radiation, Burt S. Harrison, Nov.
showing nature of true boiler efficiency, Walter T. Ray and Henry Kreisinger, Nov.
showing performance of hot blast coils, Burt S. Harrison, Oct., Nov.
Chicago association of master steam fitters, August.
Chicago, record of the weather in, for Dec., 1906, Jan.
record of the weather in, for Jan., 1907, Feb.

record of the weather in, for Feb., 1907, March.
record of the weather in, for March, 1907, April.
record of the weather in, for April, 1907, May.
record of the weather in, for Oct., 1907, Nov.
record of the weather in, for Nov., 1907, Dec.
Cleveland hippodrome, heating and ventilation of, Jan.
Cooling an auditorium by the use of ice, John J. Harris, Sept.
Cooling process, the, July.
and humidifying textile mills, new departure in, W. H. Carrier, June, August.
Cold storage by means of ice, Madison Cooper, Dec.
Combined pressure and vacuum system of steam heating, George D. Hoffman, July.
Comparison of quick circulating systems of hot water heating, C. Guitton, Feb.
Contamination of the air of our cities with sulphur dioxid, Theodore W. Schaefer, M. D., Dec.
Cooper, Madison, cold storage by means of ice, Dec.
Cost of heating store houses, H. O. Lacount, June.
Covering for range boilers, June.

D

Data for a heating engineer's handbook, Gerard W. Stanton, Dec.
Design of a plenum system of warm air heating for a school or office building, J. D. Hoffman, August.
Derivation of constants for building losses, R. C. Carpenter, March.
Donnelly, James A., standard sizes of steam pipes, Jan.
Drawing heat from nature, Dr. J. M. W. Kitchen, March.
Drying, first principles of, Oct.
volume of air required for, May.
Dust removal in a brass foundry, Walter B. Snow, Oct.
Dwyer, Emmet and W. J. Keep, new foundry of the Michigan Stove Company, Dec.

E

Eastern Supply Association, Nov.
Electric heating and steam heating, Feb.
Engineering books, new catalogue of, Nov.
Estimating heat losses from buildings, methods of, Charles L. Hubbard, Sept.
Exhaust steam heating, back pressure in, Charles L. Hubbard, June.

F

Fan blower, applications of, Oct.
Formula for pipe sizes in hot water heating, Oliver H. Schlemmer, Sept.
Foster, E. H., flow of superheated steam in pipes, June
Foundry, new, of the Michigan Stove Company, W. J. Keep and Emmet Dwyer, Dec.

G

Gas Power, relative economy of steam and, when exhaust steam is used for heating, F. W. Ballard, Sept.
Gray, Kenneth, capacities of cast iron sectional boilers, July.
Guitton, C., comparison of quick circulating systems of hot water heating, Feb.

H

Harlem hospital, New York, power house for, May.
Harris, John J., cooling an auditorium by the use of ice, Sept.
Harrison, Burt S., air leakage through windows and its effect upon the amount of radiation, Nov.
charts showing the performance of hot blast coils, Oct., Nov.
Heat losses from buildings, methods of estimating, Charles L. Hubbard, Sept.
Heaters, tests of Vento, Dec.
Heating, comparison of quick circulating systems of hot water, C. Guitton, Feb.
combined pressure and vacuum system of steam, George D. Hoffman, July.
apparatus, American, for foreign markets, March.
calculations, proposed standards for, William Kent, April, May.
electric and steam heating, Feb.
engineer's handbook, data for a, Gerard W. Stanton, Dec.
plant for Japanese steel works, Oct.
and ventilation, the schoolhouse—its, VIII (conclusion), Joseph A. Moore, March.
design of a plenum system of warm air, for a school or office building, J. D. Hoffman, August.
preliminary report of the committee to secure data on hot water, May.
on the wastes of, Dr. J. M. W. Kitchen, July.
relation of the force of gravity to some of the economics of, Dr. J. M. W. Kitchen, Feb.
back pressure in exhaust steam, Charles L. Hubbard, June.
systems for railway cars, R. C. Carpenter, March.
system, temperatures for testing indirect, W. W. Macon, Feb.
system, central, for fifty-one detached buildings, April.
store houses, cost of, H. A. Lacount, June.
and ventilation of cars, E. R. Swan, August.
and ventilation of the Cleveland Hippodrome, Jan.
central, and ventilating plant of the stock exchange at Budapest, Charles Knuth, Jr., July, August.
and ventilating pipes, standardization of cast-iron, Louis F. Pearson, March.
and ventilating a group of public schools, Samuel R. Lewis, July.
and ventilation of the Royal Alexandra Theater, Toronto, Canada, April.
and ventilation of the St. Louis public schools, William B. Ittner, Dec.
and ventilating the United States Naval Academy buildings, Oct.
ventilation and warming of St. George's Hall, Liverpool, Charles R. Honiball, Oct., Nov.
Hints on the preparation of a paper and its illustrations, W. A. Young, Dec.
High-pressure superheated steam heating system, points on the design of, combined with a light and power plant, Frank Koester, Jan.
Hoffman, George D., combined pressure and vacuum system of steam heating, July.
Hoffman, J. D., design of a plenum system of warm air heating for a school or office building, August.
Honiball, Charles R., mechanical ventilation and warming of St. George's Hall, Liverpool, Oct., Nov.
Hoskins, ozone and the diffusion of gases in the air, Dec.
Hot blast coils, charts showing the performance of, Burt S. Harrison, Oct., Nov.
Hot water heating, formula for pipe sizes in, Oliver H. Schlemmer, Sept.
water heating, comparison of quick circulating systems of, C. Guitton, Feb.
water heating system, central, for fifty-one detached buildings, April.
water heating, preliminary report of the committee to secure data on, May.
House of Commons, ventilation of the, Walter Yates, April, May.
Hubbard, Charles L., back pressure in exhaust steam heating, June.
methods of estimating heat losses from buildings, Sept.
Humidifying textile mills, new departure in cooling and, W. H. Carrier, June, August.

I

Ideal sectional boilers, improved, Nov.
Ice, cooling an auditorium by the use of, John J. Harris, Sept.
Ice, cold storage by means of, Madison Cooper, Dec.
Ittner, William B., heating and ventilation of the St. Louis public schools, Dec.

K

Keep, W. J., and Emmet Dwyer, new foundry of the Michigan Stove Company, Dec.
Kellogg, M. W., materials for the control of superheated steam, June.
Kent, William, carrying capacities of pipes in low pressure steam heating, Feb.
proposed standards for heating calculations, April, May.
Kitchen, Dr. J. M. W., drawing heat from nature, March.
on the wastes of heating, July.
relation of the force of gravity to some of the economics of heating, Feb.
Knuth, Jr., Charles, central heating and ventilating plant for the stock exchange at Budapest, July, August.
Koester, Frank, points on the design of a high-pressure superheated steam heating system, combined with a light and power plant, Jan.
Kreisinger, Henry, and Walter T. Ray, charts showing the nature of true boiler efficiency, Nov.

L

Lacount, H. O., cost of heating storehouses, June.
Lewis, Samuel R., heating and ventilating a group of public schools, July.

M

Macon, W. W., temperatures for testing indirect heating systems, Feb.
Massachusetts, new boiler regulations in, Nov.
schools, use of boilers in, Joseph A. Moore, March.
Master Steam Fitters, Chicago Association of, August.
Materials and properties of wrought pipe, F. N. Speller, March.
for the control of superheated steam, M. W. Kellogg, June.
Methods of estimating heat losses from buildings, Charles L. Hubbard, Sept.
Michigan Stove Company, new foundry for, W. J. Keep and Emmet Dwyer.
Modern Science Club, June.
Moisture in buildings, Dec.
Moore, Joseph A., the schoolhouse—its heating and ventilation, VIII (conclusion), March.
use of boilers in Massachusetts schools, March.

N

National Association of Master Steam and Hot Water Fitters, Feb., April, May.
annual meeting of Indiana State Association, April.
annual meeting of New York State Association, June.
new offices for New York City Association, April.
annual meeting Philadelphia (Pa.) Association, June.
annual meeting New Jersey State Association, June.
annual meeting of Newark (N. J.) Association, April.
San Francisco (Cal.) local association organizes, April.
report of nineteenth annual convention of, June.
National Association of Manufacturers, July.
National Association of Brass Manufacturers, April.
National Committee of the Confederated Supply Associations, Nov.
National steel tube cleaner, Feb.
New departure in cooling and humidifying textile mills, W. H. Carrier, June, August.
New York City, the weather in, during 1906, May.
record of the weather in, for Dec., 1906, Jan.
record of the weather in, for Jan., 1907, Feb.
record of the weather in, for Feb., 1907, March.
record of the weather in, for March, 1907, April.
record of the weather in, for April, 1907, May.
record of the weather in, for Oct., 1907, Nov.
record of the weather in, for Nov., 1907, Dec.
New York Juvenile Asylum—central heating system for fifty-one detached buildings, April.
Norwall air and vacuum valve, new type of, Oct.

O

Office building, design of a plenum system of warm air heating for a school or, J. D. Hoffman, August.
Oily waters and their treatment, Albert A. Cary, Jan.
Ozone and the diffusion of gases in the air, N. W. Hoskins, Dec.

P

Paper, preparation of a, and its illustrations, W. A. Young, Dec.
Pearson, Louis F., standardization of cast-iron heating and ventilating pipes, March.
Performance of hot blast coils, charts showing the, Burt S. Harrison, Oct., Nov.
Pipe covering that prevents electrolysis, Sept.
materials and properties of wrought, F. N. Speller, March.
sizes in hot water heating, formula for, Oliver H. Schlemmer, Sept.
Pipes, carrying capacities of, in low pressure steam heating, William Kent, Feb.
standardization of cast-iron heating and ventilating, Louis F. Pearson, March.
standard sizes of steam, James A. Donnelly, Jan.
Pittsburg, record of the weather in, for Dec., 1906, Jan.
record of the weather in, for Jan., 1907, Feb.
record of the weather in for Feb., 1907, March.
record of the weather in, for March, 1907, April.
record of the weather in, for April, 1907, May.
record of the weather in, for Oct., 1907, Nov.
record of the weather in, for Nov., 1907, Dec.
Power house for new Harlem hospital, New York, May.
Preston, J. Roger, a recording anemometer, Oct.

R

Radiation, methods of figuring radiation, Gerard W. Stanton, Dec.
Radiation, window leakage and its effect upon, Burt S. Harrison, Nov.
Railway cars, heating systems for, R. C. Carpenter, March.
cars, heating and ventilation of, E. R. Swan, August.
Ray, Walter T. and Henry Kreisinger, charts showing the nature of true boiler efficiency, Nov.
Recording anemometer, a, J. Roger Preston, Oct.
Reed, John R., death of, Dec.
Relation of the force of gravity to some of the economics of heating, Dr. J. M. W. Kitchen, Feb.
Relative economy of steam and gas power, when exhaust steam is used for heating, F. W. Ballard, Sept.
Royal Alexandra Theater, Toronto, Canada, heating and ventilation of the, April,
Report, preliminary, of the committee to secure data on hot water heating, May.

S

St. George's Hall, Liverpool, mechanical ventilation and warming of, Charles R. Honiball, Oct., Nov.
St. Louis public schools, heating and ventilation of the, William B. Ittner, Dec.
St. Louis, record of the weather in, for Dec., 1906, Jan.
record of the weather in, for Jan., 1907, Feb.
record of the weather in, for Feb., 1907, March.
record of the weather in, for March, 1907, April.

record of the weather in, for April, 1907, May.
record of the weather in, for Oct., 1907, Nov.
record of the weather in, for Nov., 1907, Dec.
Sanitation of air, Konrad Meier, Feb.
Schaefer, Theodore W., M. D., contamination of the air of our cities with sulphur dioxid, Dec.
Schlemmer, Oliver H., formula for pipe sizes in hot water heating, Sept.
School or office building, design of a plenum system of warm air heating for, J. D. Hoffman, August.
Schoolhouse, the, its heating and ventilation VIII (conclusion), Joseph H. Moore, March.
Schools, heating and ventilating a group of public, Samuel R. Lewis, July.
Sirocco fans now made in America, May.
Snow, Walter B., dust removal in a brass foundry, Oct.
Speller, F. N., materials and properties of wrought pipe, March.
Standard sizes of steam pipes, James A. Donnelly, Jan.
Standardization of cast-iron heating and ventilating pipes, Louis F. Pearson, March.
Standards, proposed, for heating calculations, William Kent, April, May.
Stanton, Gerard W., data for heating engineer's handbook (1) methods of figuring radiation, Dec.
Steam heating, carrying capacities of pipes in low pressure, William Kent, Feb.
heating, electric heating and, Feb.
heating, combined pressure and vacuum system of, George D. Hoffman, July.
heating, back pressure in exhaust, Charles L. Hubbard, June.
heating, supply mains and risers for one pipe, August.
heating systems, points on the design of a high-pressure superheated, combined with a light and power plant, Frank Koester, Jan.
Steam and gas power, relative economy of, when exhaust steam is used for heating, F. W. Ballard, Sept.
superheated, materials for the control of, M. W. Kellogg, June.
superheated, flow of, in pipes, E. H. Foster, June.
Storehouse, cost of heating, H. O. Lacount, June.
Sun, a novel conception of the, July.
Swan, E. R., heating and ventilating of cars, August.
Sweeping compound, a dustless, June.

T

Tait, Thomas, temperature scales, Sept.
Temperatures for testing indirect heating systems, W. W. Macon, Feb.
regulation for the United States Naval Academy buildings, Nov.
scales, Thomas Tait, Sept.
Theater, heating and ventilation of the Royal Alexandra, Toronto, Canada, April.
Trade, movement to extend, Nov.

U

United States Naval Academy, heating and ventilating the, Oct.

V

Vacuum system of steam heating, combined pressure and, George D. Hoffman, July.
Vento heaters, tests of, Dec.
Ventilating, United States Naval Academy, heating and, Oct.
plant, central heating and, of the stock exchange at Budapest, Charles Knuth, Jr.,, July, August.
heating and, a group of public schools, Samuel R. Lewis, July.
pipes, standardization of cast-iron heating and, Louis F. Pearson, March.
Ventilation, industrial, Sept.
and warming of St. George's Hall, Liverpool, Charles R. Honiball, Oct., Nov.
the schoolhouse, its heating and, VIII (conclusion), Joseph A. Moore, March.
heating and, of the Cleveland Hippodrome, Jan.
effect of air leakage upon, Jan.
of the Boston subway, Feb., March.
heating and, of the Royal Alexandra Theater, Toronto, Canada, April.
heating and, of the St. Louis public schools, William B. Ittner, Dec.
of the House of Commons, Walter Yates, April, May.
Vesterdahl refrigerating machine, home of, May.
Volume of air required for drying, May.

W

Weather, record of the weather, in New York, Boston, Chicago, St. Louis and Pittsburg for Dec., 1906, Jan.
record for Jan., 1907, Feb.
record for Feb., 1907, March.
record for March, 1907, April.
record for April, 1907, May.
record for Oct., 1907, Nov.
record for Nov., 1907, Dec.
in New York City during 1906, May.
Whitten, H. W., air leakage around windows and its prevention, Dec.
Williams, Thomas H., death of, Dec.
Windows, air leakage through, and its effect on the amount of radiation, Burt S. Harrison, Nov.
Wing turbine fan for forced draft, June, Oct.
Winter of 1906-1907 in New York, Boston, Pittsburg, St. Louis and Chicago, May.
Wood, spontaneous ignition of, Sept.

Y

Yates, Walter, ventilation of the House of Commons, April, May.
Young, W. A., hints on the preparation of a paper and its illustrations, Dec.
